

American Fiber Green Products, Inc.
Amour Licensing Agreement

Amour Fiber Core Inc. (Amour) has developed and patented a new advanced technology, which recycles polyester resins and fiberglass wastes into new high strength, commercial and consumer products. Amour is reportedly the only company in the world who has developed an economically successful fiberglass recycling process. Presently, Amour's product list includes: picnic tables, benches, maritime decking, ferry dock fendering systems, boat dock fendering systems, general planking, seawall planking, marine and construction pilings, marine log booms, parking stops and barriers. In addition to many standard products, the Company has the capability to produce custom products.

American Fiber Green Products will offer Licensing Agreements for both collection/processing and manufacture of Amour products. The cost of the license will be determined by the specific territories and applications desired.

Inquiries about licensing of the Amour process have been received from various parts of the U.S. and Canada as well as China, India, Japan, Egypt, Turkey, Australia, Germany, England, and France. The issuance of License Agreements will be preceded by qualification of the potential Licensee. The qualification process will include, but not be limited to, review of financial strength, business skills, integrity, and experience.

Should you have a genuine interest in advancing the Amour process by securing a licensing agreement for pickup and processing or if you have manufacturing capability, we trust that you will fill out and return the information sheet below so that one of our managers can contact you.
